

**LET'S  
TALK**

# OSTEOARTHRITIS

Elanco

Elanco is committed to bringing the veterinary industry valuable continuing education. There are 2 great webinars that Elanco will be hosting on canine osteoarthritis over the next month, we encourage you to review the dates and topics below, and sign up for one or both based on your availability and interests.

These programs have each been submitted (but are not yet approved) for 1 hour of continuing education credit in jurisdictions which recognize RACE approval.

## Arthritis – Struggling with chronic pain (~1 hour)

Delivered by:

**Dr. Tara Edwards, DVM, DACVSMR, CCRT, CVPP**

Despite arthritis being a common and debilitating disease, many patients are diagnosed in the later stages once disability and chronic pain have become established. From a rehabilitation perspective, this presentation will discuss how chronic pain can impact mobility and the value of having individualized treatment plans for our arthritic patients. The importance of addressing arthritis from a multi-modal treatment strategy will be discussed and management options from pharmaceuticals to rehabilitation will be explored.

## Galliprant® – Quick facts on what sets Galliprant apart (~20 mins)

Delivered by:

**Dr. Katelyn Ford, DMV**

An overview of this exciting pain medication that can be used to treat and control the pain and inflammation of canine OA.

## Practical rehab tips for the management of OA (~45 mins)

Delivered by:

**Dr. Danielle Anderson, Bsc, DVM, CCRP, cVMA**

Our ability to manage our osteoarthritis patients is improved by approaching them from a multimodal perspective. This includes NSAID's but also supplements, and rehab modalities. But where do we start? This talk touches upon tips to better diagnose these patients, and improve owner rehab compliance, as well as special considerations for rehab with our senior canine patients, and finally a brief discussion on the business side of rehab.

## Understanding the appropriate pain medications for OA (~30 mins)

Delivered by:

**Dr. Conny Mosley, Dr.med.vet., DACVAA, CVA**

We will review a specific OA case and discuss the different options for pain management and joint support. The goal is to understand the mechanism of actions of specific medications and joint health products, as well as address the supporting literature and clinical experience.
