

INVITATION TO A LIVE WEBCAST

Fight back against periodontal disease: Understanding the disease and the role of prevention

Monday, January 31, 2022,
at 3 p.m. (EST)

12:00 BC (PST) 1:00 AB (MST) 2:00 SK/MB (CST) 3:00 ON/QC (EST) 4:00 PEI/NB/NS (AST) 4:30 NL (NST)

Understanding periodontal disease (PD) is an important first step in controlling the disease and the impacts it has on patients. During this webcast, **Dr. Josée Marcoux** will retrace the pathogeny of PD, with a focus on how to convey to clients the importance of the disease and its prevention. She will also be thoroughly discussing home care.

Join us as we look into ways to help control and prevent periodontal disease.

Presented by
Josée Marcoux
DVM, IPSAV
D.E.S. in Dentistry

After returning to college, Dr. Marcoux decided to pursue her dream of becoming a veterinarian, and graduated from the *Faculté de médecine vétérinaire* at the *Université de Montréal* in 2016. Her interest in veterinary dentistry began during her second year of studies. She completed a general internship working with small animals, as well as a dental residency program at the same university. Dr. Marcoux completed nearly a dozen of external dental medicine internships across Canada and the United States during her curriculum. Throughout her career, she has had the opportunity to deepen her knowledge of exotic species, and handle patients weighing from 2 kg to 600 kg! She now hopes to complete her board exam at the American College of Veterinary Dentistry and become a reference in teaching veterinary dentistry in Quebec. Following her residency in 2020, she joined e-vet Mobiles to work more closely with her veterinary colleagues.
